1. What are the benefits of using JIRA?

Answer:

- **Upfront and fair licensing policy**
- **Features that is not available elsewhere**
- **Get latest update on the progress of projects**
- **It runs anywhere and is recognized with many famous companies**
- **Easily extensible and customizable**

2. Explain Working with workflows in JIRA?

Answer:

A JIRA workflow is an arrangement of statuses and transitions that an issue travels through amid its lifecycle and normally speaks to forms inside your organization. There are pre-defined built-in workflows that can't be altered; in any case, you can duplicate and utilize these built-in workflows to make your own.

3. What is Agile Testing and How is Agile Methodology different than Traditional Waterfall process?

Answer:

The first question of agile interview question tests your knowledge about the basic of agile testing. Agile testing is a practice based on the principles of agile software development. It includes all members of an agile team with specific skills and a certain expertise to ensure the timely delivery of a product with the release of additional features at frequent intervals.

This is the most commonly asked agile interview question. In agile methodology, features of the software are delivered frequently, so that the testing activity is done simultaneously with the development activity. Testing time is shortened as only small features are needed to be tested at once.

4. What is Kanban?

Answer:

It is one of the common agile interview questions. Kanban is a tool which helps the team to keep a close eye the work i.e., to measure its progress. Apart from the progress, the status of a development story can be seamlessly described with the help of 'kanban board'. Kanban board aids in writing the whole scenario of a project at a single place to give a perfect picture of the bottleneck, a task done, workflow progress. It helps in the continuous delivery of the product without overburdening the team.
