HTML & CSS Workshop

Clarusway

Subject: HTML & CSS Workshop

Learning Goals

- Practice using the HTML & CSS basic commands and create a portfolio page.

Introduction

We've covered HTML Headings, Formatting Elemenets, Tables, Images, Links and CSS Basics, but now it's time to put the concepts into practice. We'll start with building a portfolio page.
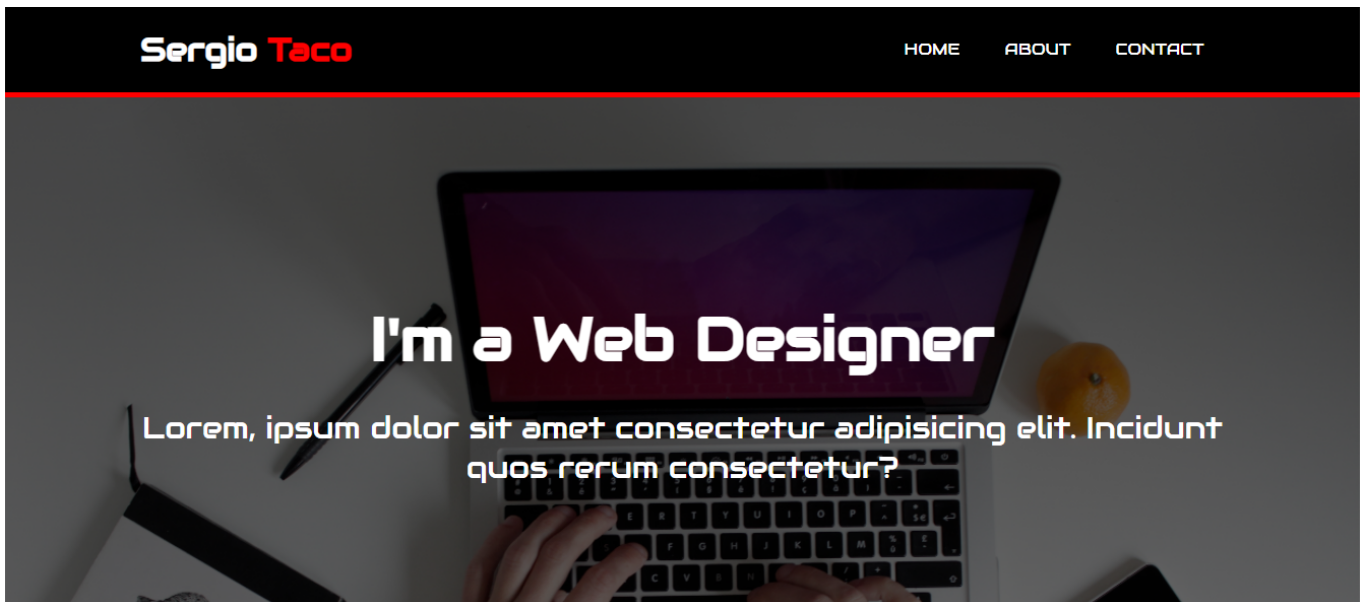

Practice Building a Portfolio Page

You might notice a few new things in this lesson that you haven't encountered before. We'll walk you through them.

Problem Statement

- Write a code that creates a Portfolio Page.

- Functionally similar to this: Portfolio Page

Additional Resourses

- Picture's link Image One

Code Along

Your Portfolio Page consists of 3 different pages. First and the main page is Home Page. Second one is About Page and third one is Contact Page. You can navigate between pages.

1. Your portfolio should have a home page. Home page should have a header section with an id of "header". In this header section there will be a division with an id of "container". This container will have two other divisions. First division will have an "h1" element that contains text. Second division will have a navigation bar.

```
<div id="header">
    <div class="container">
        <div id="branding">
            <h1>Sergio <span id="spanColor">Taco </span> </h1>
        </div>
        <div id="nav">
            <ul>
                <li><a href="index.html" target="_blank">HOME</a></li>
                <li><a href="about.html" target="_blank">ABOUT</a></li>
                <li><a href="contact.html" target="_blank">CONTACT</a></li>
            </ul>
        </div>
```

```
            </div>
        </div>
```

2. Home page should have a main section with an id of "main". Main section will have a division with an id of "container". This container will have an "h1" and "p" elements that contain text.

```
<div id="main">
    <div class="container">
        <h1>
            I'm a Web Designer
        </h1>
        <p>
            Lorem, ipsum dolor sit amet consectetur adipisicing elit. Incidunt
quos rerum consectetur?
        </p>

    </div>
</div>
```

3. Your about page should have an about section with an id of "about. About section will have an "h2" and "p" elements that contain text.

```
<div id="about">
        <h2>About Me</h2>
        <p>Hi, I'm Sergio Taco! <br> I'm a Freelance Web Designer focused on
creating clean, responsive web designs!
        </p>
</div>
```

4. Your contact page should have an contact section with an id of "contact. Contact section will have an "h2" and two "p" elements that contain text.

```
<div id="contact">
        <h2>Contact Me</h2>
        <p>Whether you're interested in working with me or just want to say hello,
I'd love to hear from you! </p>
        <p>sergio@clarusway.com</p>
</div>
```

☺ **Thanks for Attending** ✍
